October 15, 2001

S&WE Products Manager Carol Hanlon
U.S. Department of Energy
P.O. Box 30307 M/S 025
North Las Vegas, NV 89036-0307

S&WE Products Manager Hanlon:

I am very concerned about the Yucca Mountain Nuclear Depository. With numerous issues still unresolved (such as potential leakage to the aquifer below, active seismic activity, and the numerous transportation accident-related risks to name but a few) I don't see how the Secretary of Energy (and the DOE) can recommend Yucca Mountain for a high-level nuclear waste dump. Without clear and concise analysis of the impacts to transportation, finalized Siting Guidelines, and licensing rules, make consideration by the Department of Energy premature and flawed. The Nevada site is unsuitable. I urge you to abandon the Yucca Mountain Project.

Sincerely,

Marshall Goldberg
